

Growth through Partnership

Nuclear Energy Ecosystems - Open Business Day 2022

– Building nuclear energy future together –

3-4 May 2022

Megumi Asano-Ulmonen, FinNuclear Association

Mission

FinNuclear

FinNuclear's mission is to be an enabler that contributes to empowering the Finnish nuclear energy industry for stronger co-operation, creating general operating conditions, awareness and international credibility - opportunities across borders.

FinNuclear Association

- Network of committed suppliers and contractors
- Focus on networking and promoting cooperation
- Joint marketing
 - [FinNuclear Directory](#)
 - Exhibition
 - Events, forums
- E-learning environment
- Joint offering development projects
 - FINUELS orchestration

FINUELS Partners

NUCLEAR ECOSYSTEM IN FINLAND

Finnish advanced nuclear programs have been achieved through the joint activities of licensees and their ecosystem, which includes suppliers, contractors and research institutes. Finnish subcontractors are organized under the FinNuclear Association. It promotes Finnish companies' general preconditions, cooperation, competences and international profiles in manufacturing, construction and service activities in the nuclear energy field.

By 2025, the closer interplay of Finnish nuclear power industry players has elevated our country to become a world thought leader in the field.

FINUELS Orchestration project for Finland's nuclear life-cycle competences

Let's evolve together

- Suppliers/contractors play a significant role in NPP operations = partners
- Local partners bring value in ensuring availability and flexibility – [national industrial involvement program](#)
- Continuously developing sustainable relationship
 - strengthening understanding of requirements
 - following the technological and market developments in ever-changing environment
- Ecosystem and network, a path to enter nuclear energy business
- Standardization and harmonization
